-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a first office action on the merits of application SN 10/560,813.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed 3/17/09 and 12/15/05 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,246,324 to Shimoyama. Shimoyama teaches a housing having a bore (11a), a receptacle (25), and a fixing screw (40,41).
5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 2,797,720 to Mann. Mann teaches a housing having a bore (22), a receptacle (20), and a fixing screw (20).
6. Claims 1-4, 7, 9-12, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,538,377 to Stewart. Stewart teaches a housing having a bore (22), a receptacle (25), and a fixing screw (26). The bore (22) is formed in the lug (16) which bent from the tab (18) which has the receptacle stamped in.
7. Claims 1, 2, 4, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 2,878,905 to Langermeier. Langermeier teaches a housing having a bore, a receptacle (9), and a fixing screw (3).

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,538,377 to Stewart in view of US Patent 5,713,707 to Gagnon. Stewart discloses every element as claimed and discussed above except a cutout. Gagnon teaches a cutout (44) at the bend between the lug (22) and tab (24). At the time of the invention it would have been obvious for a person of ordinary skill in the art to modify the housing of Stewart by adding a cutout between the lug and tab as taught by Gagnon to allow for easier bending since there is less material to bend.

10. Claims 5, 6, and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,538,377 to Stewart in view of US Patent 4,987,761 to Saccoccio. Stewart discloses every element as claimed and discussed above except the lug folded from the wall of the housing. Saccoccio teaches housing (10) having a bent lug (20) with a bore (24). At the time of the invention it would have been obvious for a person of ordinary skill in the art to modify the housing of Stewart by using it on structure with bent lug such as taught by Saccoccio so that the structure is formed from one blank.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TIMOTHY M. AYRES whose telephone number is (571)272-8299. The examiner can normally be reached on MON-THU 8:00 - 5:00.
